## PERSONAL PROJECTS

\*Image Formatter

*Developed a tool to convert images between various formats.*

- **Tools & technologies used:** HTML, CSS, JavaScript
- **Description:** Created a web-based image formatter capable of converting images from one format to another (e.g., JPG, PNG, GIF, BMP). This tool allows users to upload an image, select the desired output format, and download the converted image. The formatter supports batch processing, enabling multiple images to be converted simultaneously.

\*Weather Web App

*Develop a web application to display real-time weather information*

- **Tools & technologies used:** JavaScript, HTML, CSS, Open Weather Map API
- **Description:** Built a responsive web application that fetches and displays current weather data for any location worldwide. Users can input a city name, and the app retrieves weather information such as temperature, humidity, wind speed, and weather conditions. The app is designed with a clean and user-friendly interface, making it easy to check the weather on the go.
